PHOENIX LOFTS OF AUSTRALIA - BARRY & SHIELA DEVINE

END OF AN ERA - COMPLETE SELL OUT

Stock Birds, Race Birds, the Winners & Prize Winners Baskets & S.T.B. Quartz Clock.

At 67 years of age I have decided to call it a day, still in good health. I would like to do some travelling around Australia and overseas and devote more time to my family.

Having such a large team of pigeons it has become a 7 day per week involvement which prevents me from doing anything else.

My wife Shiela has developed a serious illness also which can be cured but will take time and a lot of assistance from myself and the family.

This has been a very hard decision to make but like anyone else I have to put my wife and family first and foremost.

1. The Desmet Matthijs are from Allen Browns clearance sale Melbourne in 1999. All four birds were hand selected by Allen for me. One Desmet from John Dismore and one Desmet obtained from Robert North. Raced by Dave Able of Ipswich, won 1st Batemans Bay 935 km, 1st Tuncurry 505 km by 20 minutes.

One of the original cocks from Allen Brown has since died rung 91. This family of imports has bred Chris Ostojic of Brisbane 1st QPF 400 miles. Barry Dodds, winner of VPU Old Bird aggregate three years in succession consistently won with Desmits x Janssens and John Dismore in Melbourne has consistently won with birds bred down from Desmits purchased at Alan Brown's sale. All have produced excellent race and Stock Birds. They have all been kept together, only a few crossed with the Houbans. To describe the Desmits - they have beauty, brains and stamina, probably the nicest looking pigeons I have seen and very reliable.

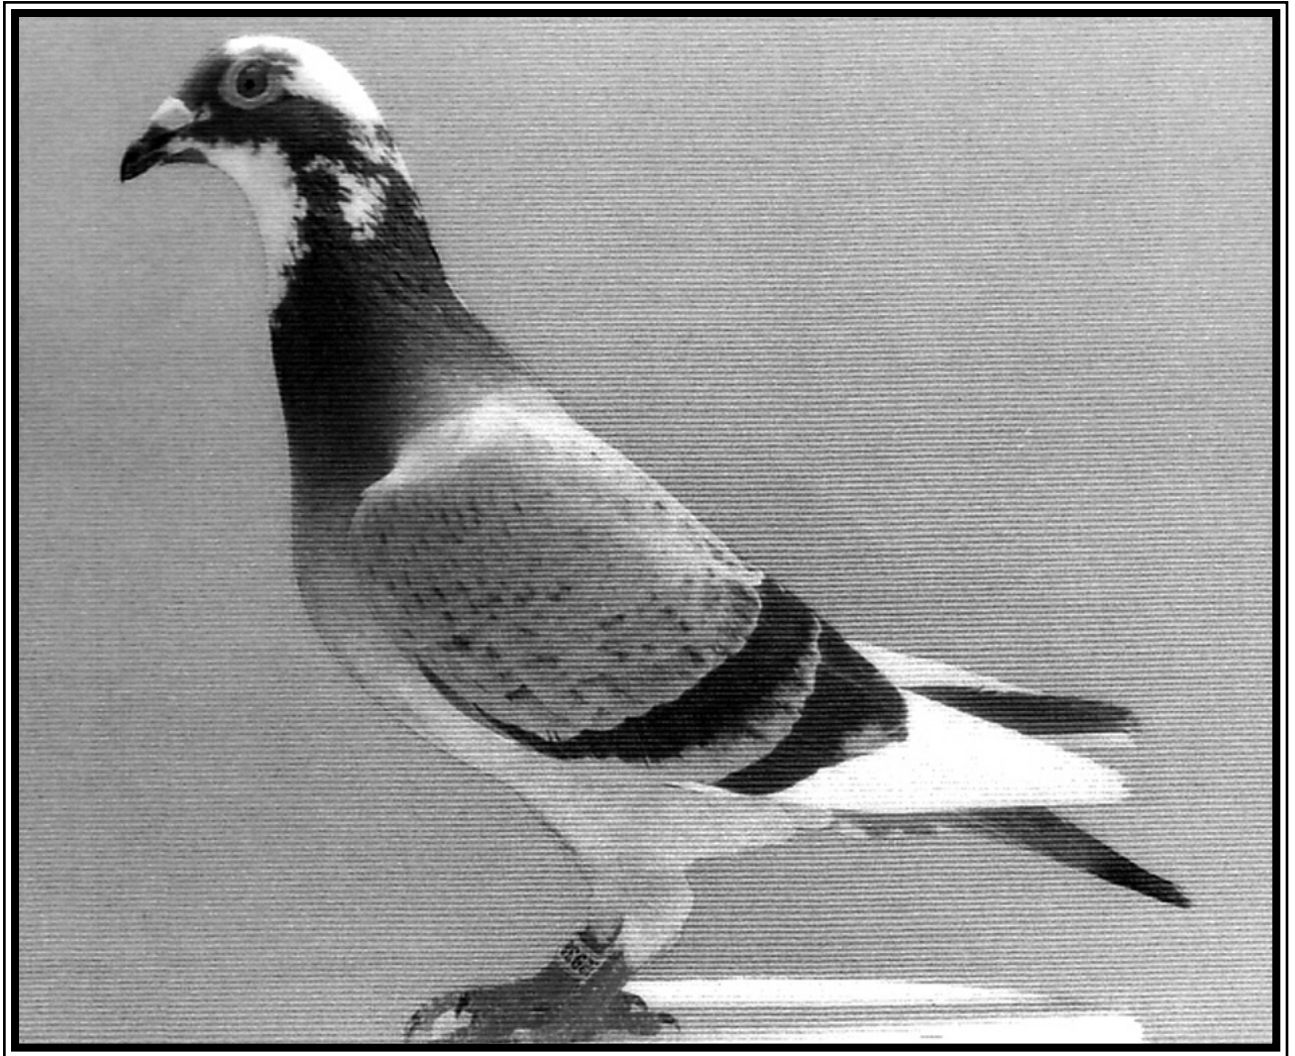

2. The Keith Wrightsons pair were bred especially for me by Keith a few years ago. Keith has been flying pigeons for over 60 years and would have to be one of the best long distance flyers in Sydney, especially at 700 mile. The pair Keith bred me are off his 700 mile winner and his national winners. I believe this is the first time Keith's birds have been put up for auction, the original pair would be sold in Melbourne plus 5 of the young and six will be sold in Brisbane, full pedigrees on each Lot.

3. The Goodgers I have come about when Roger Mortevedt visited Australia and stayed with John Pryor and Bill Wallford in Adelaide. Roger took a liking to the Goodgers and three pair were acquired and placed with me to breed off and test them and then send them off to America. Each time we had them ready Newcastle Disease broke out in NSW and prevented them going. I am unable to hold them any longer so they will all be put up for auction. There will be 12 or so in Melbourne sale and Brisbane.

There are over sixty Goodgers and will be auctioned in Ballarat on Sunday, 9th July 2006. Contact Greg Burges - 03 5335 8304. John Share Red Hen Mealy Cock 2nd Feb and 13th Feb 500 miles. Bill Wallford one pair and one pair from Grant Patterson. By way of John Share in the pedigree all have the famous Lots 53 & 60. The Cook winner of course the Elliot Hen.

They all look good and handle well. Some have what I call a Black Pearl Eye. These came from the Bill Wallford Hen I believe. I don't believe you can get better Goodgers than these.

THEY ARE AS GOOD AS THEY GET!
Detailed pedigrees on all lots.

WICKHAM

LOT 43 BLUE PENCIL PIED HEN AUST 98 22938

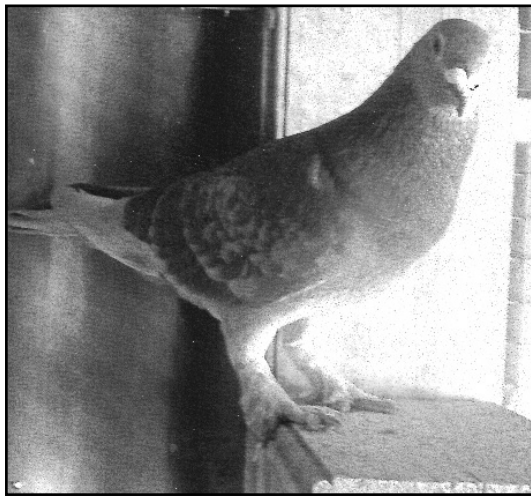

Won 2nd Club, 3rd Section,
5th overall from Launceston 900 KM timed in on the second day.

ENDIGOS

I obtained the parents of these from Graham Davidson. One Cock MBRA 99 0383 won Graham a 500 mile Combine winner, the Mother I obtained from Ray Read, President of Maroubra Pigeon Club LIV 92 3006 Mother of Grahams pigeon also bred Ray a Combine winner from Casino 365 miles. Mother and Son were paired together to produce the ones I have now. There were no others available or alive that I was aware of. They are very rare, no one has these pigeons anywhere now days that I am aware of. The Endigos work extremely well, they work for hours if you let them. When they are fit and in work they look or go a Gold colour very attractive and they win (I believe you will strike gold with them on the race track). They are an all Australian Pigeon, no European blood in them at all.

Note: - The only medication used on these pigeons is a little iodine occasionally.

NO ANTIBIOTICS OR HEAVY CHEMICALS USED
Their reproduction system has not been affected or damaged.

2nd - Club - 11th - Fed Temora 540ml

2nd - Interclub Combine Roma 200ml
(coloured bird race sent 2 red hens on a separate release; they landed together)

As you can see Barry, a truly marvellous Pigeon is 7042, he has a lot of character this cock and rules his nest. He is afraid of nothing including me. This year I will race the first of the Grand Children and hopefully I'll do even better with them.

Your in the Sport of Pigeon Racing

Les Hansson

WICKHAM

There are a couple of things of importance that I would like to point out to intending buyers.

These birds have not been medicated with antibiotics at any time. In my opinion Pigeons that have been medicated heavily or lightly would definitely have had their reproductive systems partly destroyed as well as their immune systems. As I stated in my story in the journal March issue that I let the pigeons build their own immune systems up.

One other important issue also is when I am racing these pigeons - I can race them every week if necessary and mostly do even if the velocities are down to 900 mpm. They don't need two or three weeks rest to come back into condition. After a Saturday race my pigeons are jumping in the loft by Monday. The only medication used is iodine occasionally and apple cider vinegar. You usually can tell if pigeons are medicated by their poor feather quality.

You will find my pigeons have a very silky feather and will slip through your hand.

GOODGER

LOT 11 **RED CHECKER HEN** **LIV 02 3969**

Raced in Liverpool Club Special Race on the western line, always a very reliable hen. At the 600 km point a strong north west wind blew most birds into Victoria and was a smash race. 3969 came home next day. Would have to have flown most of the way from Victoria on her own, a very gutsy hen. Very nice handling, lots of potential at stock, I believe.

Blacks were only bought in two years ago, mainly to pair to the Endigos. They are very good quality, they too love to work and are always the last down.

The Mother is a Blue Bar AUST 94 5167 bred off two national winners by Bob Appleby.

The cock is black FRP 02 1155 son of above 5167, this black cock raced north and south for Mr Sid Webster an old identity in Sydney Pigeon Racing.

LOT 93	BLACK COCK	AUST 98 14741	

Bred by Fred Burton no records available.

THE PHOENIX PIGEONS

Over the years the Phoenix Pigeons have been raced in every state in Australia with success. Have done very well in Perth.

I developed them myself in the late 1960's early 1970's. The main two were a Blue Pied Cock who won Bundaberg 600 miles combine for a Mr Bill Eastcott on the day the first pigeon achieve that at the time on the day. The hen was known as the 7510 hen and came from Bob & Harry Appleby's loft who was bred of the Black Prince and a Side Witford hen well known in those days and then a Blue Bar Cock was introduced and it was a Peddie Cock and the Blue Bar colouring dominated from then on. I won nearly every race point with the pigeons right up to mid 1990's.

They crossed very well with the Wickhams.

I won the Young Bird National this way bred in 1993.

The main breeding cock of late in my loft is Blue Bar Cock Rung BANK 91 1243

his son BB AUST 98-7284 (is in the sale) Blue Bar Hen BANK 96-651,

she won four races and bred many winners
